

CELEBRATING
1984-2017

Comac was established in 1984 and in 1992 came out with the BLAST, the first high power high output hand dryer and a drying time of 9 second. Over the years, Comac BLAST has been often imitated but never equaled.

For the 33 years anniversary of Comac and the 25th year anniversary of the BLAST, all the electrofed members will take advantage of a special anniversary pricing.

This year, we are also launching 2 new hi-tech Hand dryers, the ONE and the i-Cast that are breaking the limits of the hand dryer industry.

We are also proud to announce that we became an official member of the North American Association of Subway Franchisees (NAASF) and an official **SUBWAY** supplier.

AT COMAC, WE DRY HARDER !

Please contact Comac for more Info and pricing
